## Who Is a Mental Defective?

A measure recently introduced at Albany by Senator KNIGHT might well be called the Who's Loony Now bill. It would apply to the State in general, but its character is most quickly seen through a perusal of the paragraph relating to this town tively as though he still dominated planters and other residents declar-negro minstrel. Modern invention and its inhabitants:

"Whenever in the city of New York an information is laid before a magistrate that a person is apparently a mental defective, the magistrate must issue a summons or warrant to any marshal or policeman of the city of New York, reciting the substance of the information and commanding the appearance of the alleged mentally defective person before the magistrate or his arrest and production before such magistrate."

After all that, if the magistrate decides that the prisoner is "apparently a mental defective" he must send him to Bellevue for examina-

against Mrs. Doe with a magistrate, March 11. This was good business Doe. Even if the magistrate is wise tion to a bond issue than by giving enough to determine the exact state it a bargain flavor. of the prisoner's mentality, Mrs. Roe life in that neighborhood.

Aside from the opportunities it gives to the spiteful a law such as Senator Kniehr has drafted would be a dangerous thing. What is a mentally deficient person? According to the International Encyclopedia he is "one who by reason of anatomical or pathological conditions occurring in the brain at or before birth is unable to compete successfully with his normal fellows in play, study or work." That is as in the paper money circular tion of the Bank of France. This definition policy in French finance was done for the Maoris. It is safe to say that if the prohibition law is entire to work office, but he is carrying on the good work.

Perhaps the bankers, with their paper money circular tion of the Bank of France. This definition policy in French finance was the natives of Samoa what it has done for the Maoris. It is safe to say that if the prohibition law is entire to be at a tax law in that thought could not bind thought look as done fine efficiency.

The ninth concert of the Society of the Friends of Music took place yesterday afternoon in Town Hall. The program consisted of Haydn's G major symphony, known as "The Oxford;" Mozart's D major violin concerto (No. 218 in the Koechel catalogue) and Vitezslav Novak's "Slovak Suite." The solo violinist was Alexander Schmuller. Artur Bodanzky and an orchestra from the Metropolitan Opera House were the other forces engaged in the concert. The Mozart concerto is no stranger to local music lovers, who find in it many things to interest them. Not the least of these are certain foreshadowings of ideas employed in "Le Nozze di Figaro." But possibly what signifies most of all is the delightful sontaneity of the composition and its perfect suitability to the instrument for which it was written. Mozart studied violin at the feet of his father, who was a performer and teacher of fine accomplishments, and at one time he was ambitious himself to

coming on and passing. We figured the possible numbers, with the progress at about ten miles an hour and the herd closely massed. It went into millions. General Maus related it as the most

amazing experience he ever had wit-nessed. He had described it to Frederic Remington and had offered to guide him to the spot and describe minutely the details and the military costumes, but terested in that buffalo stampede as an

epic in American life that long since has vanished. In the summer of 1894, while I was camping in Yosemite Valley with Herbert Hoover and three other college companions, I heard, while reading in camp one day, the insistent and loud whinnying of a horse, evidently from one spot and continued probably for more than half an hour. Familiar with horses from smallest boyhood and knowing calling to a missing mate, but generally

ary calling.

There, up to its neck in the frigid snow waters of the Merced River, was one of our own horses, its body held from downstream sweep in the rapids by a tree that had fallen into the river, and the caved in bank indicating where the horse, while grazing, had fallen over a b sheer brink. I lassoed the head, but was unable to pull the weakened animal in or up the bank, the surface of which on "The Hope of the World," Star Demo-was higher than the horse's head. Sound-ing an alarm, soon other campers came. 8:30 P. M.

It stood like a croquet wicket, its four feet together and its whole body quivering with cold. By rubbing and sunning, and finally walking it slowly and then more briskly for an hour, it the scream of the mountain lion, per-was restored to normal condition.
